

Course material sharing system for UIU students

▫ Introduction

A system where users can seek help for UIU course materials. A user can get easily course materials. Also, can do uploads course material. Here users are basically UIU running students.

▫ Features

The system stores of each and every material of all courses. The system stores course title with unique course code, course teacher name, lectures, books, questions, trimester. Student can search for their necessary courses and can avail them.

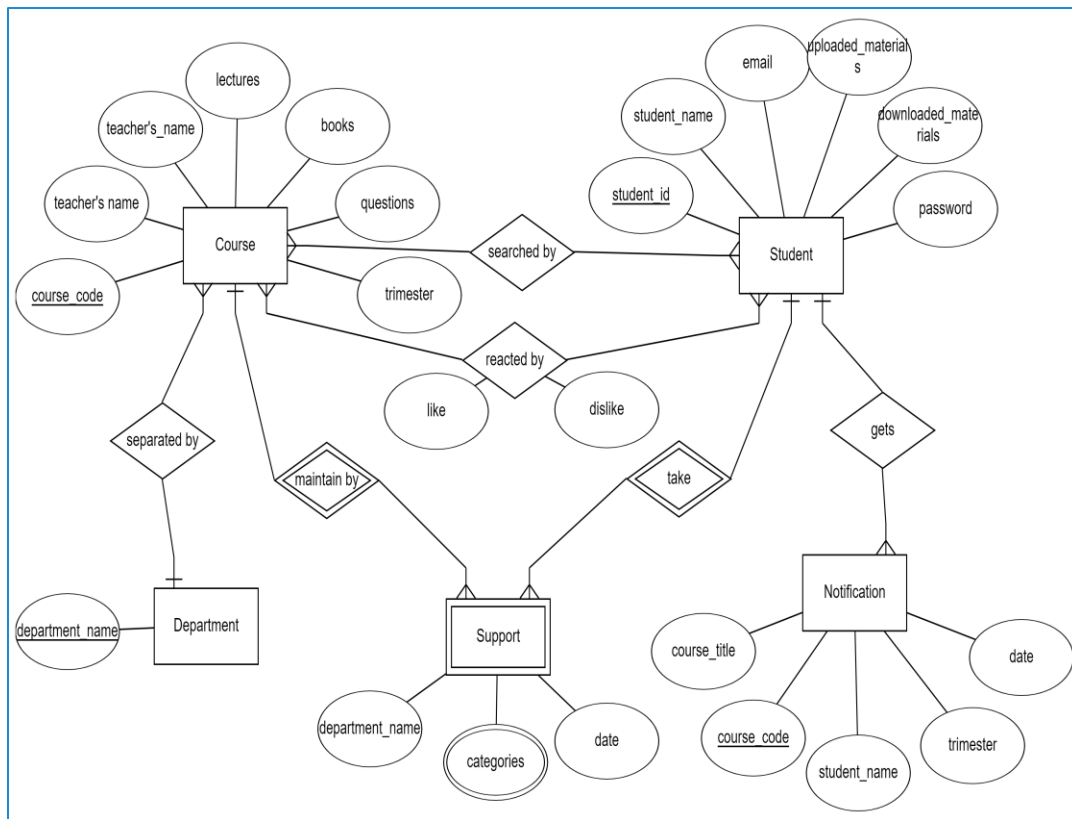

The system also stores information of students who have official UIU mail, student id(unique), student name, uploaded course materials, taken course materials. Student can request for course materials and upload course materials. Student uses their student id with password for sign-in on website. They can react(like/dislike) the course materials.

The system provides notification option. Where students can get to know which course material is uploaded. Each notification has course title with course code, date, trimester information, name of that student who provided the course material.

The system separates course materials by each department. Student can only get those courses of their particular department. Each department has unique name.

The system also provides support box option, where students can give their request for any kind of support regarding to course material. Support box has date, categories and department name. Support box is identified uniquely by student id and course code.
